Prosper, TX 75078 | 989-312-3420 | bhagathsiddi@gmail.com | linkedin.com/in/bhagathsiddi

DIRECTOR OF AI ENGINEERING | STRATEGY & ENTERPRISE ML LIFE-CYCLE

Visionary Engineering Leader with 20 plus years of software experience, expert at building and scaling high-performing AI/ML teams for B2G and enterprise SaaS platforms. Proven for executing strategic technical roadmaps, deploying production-grade agentic workflows, and LLM applications at scale, enhancing development velocity and product quality across the software development lifecycle. Drives the operationalization of AI and automation into structured engineering workflows, fostering a culture of technical excellence and secure development practices aligned with SOC 2/NIST principles. Adept at balancing aggressive execution timelines with a customer-centric focus and collaborative leadership.

CORE AI COMPETENCIES & TECHNICAL LEADERSHIP

- **AI Strategy and Automation Leadership:** Expertise in translating executive business objectives into executable engineering roadmaps, setting the technical vision for enterprise AI/ML systems, and ensuring architectural governance. Drives the operationalization of AI, coding agents, and automation across the SDLC to move beyond individual tools into structured workflows, significantly improving development speed, QA coverage, and overall product quality.
- **Advanced Agentic Engineering Workflows:** Possesses deep technical command over LLM technologies including prompt engineering, Retrieval-Augmented Generation (RAG), and multi-step reasoning. Specializes in designing and deploying production-grade agentic workflows and tool-use orchestration agents that integrate seamlessly into modern developer workflows for enhanced velocity and reduced manual work.
- **Enterprise MLOps and Secure SDLC Governance:** End-to-end ownership from research and rapid prototyping through production deployment, experiment tracking, and cloud-native observability. Establishes and enforces robust standards for code quality, automated testing, CI/CD, secure development practices, and release readiness across frontend, backend, and QA teams.
- **Cloud-Native Infrastructure and Big Data Architectures:** Advanced proficiency with cloud-native ML ecosystems across Azure (Azure ML, Azure DevOps pipelines) and AWS serverless computing alongside Python, Spark, Delta Lake, and SQL data architectures. Applies strong understanding of cloud infrastructure, DevOps practices, and CI/CD pipelines to ensure scalable, reliable SaaS product delivery.
- **Team Scaling, High-Standards Culture and Responsible AI:** Dedicated to recruiting, mentoring, and managing engineering talent while cultivating a high-performing, inclusive culture focused on ownership, fast execution, and technical excellence. Implements responsible AI principles, clinical data governance, and secure SDLC practices, supporting SOC 2 and NIST-aligned requirements in high-trust environments.

PROFESSIONAL EXPERIENCE

7-Eleven

Frisco/Dallas, TX

Senior Engineering Manager / Head of Technology - 7Now Delivery Platform

2024 – 2026

- **AI Strategy & Product Development:** Spearheaded the adoption of advanced engineering practices and AI-native system designs, scaling the platform to support high-volume distributed applications serving over 250 million users.
- **Rapid Prototyping & Execution:** Led multi-scrum engineering teams to move fast from proof-of-concept to production-grade deployment on aggressive timelines, achieving a measurable 25% reduction in overall time-to-market.
- **Data-Driven Leadership:** Exercised sound judgment and swift decision-making to optimize core product roadmaps and timeline estimations, building cross-functional consensus with stakeholders to reduce post-launch system anomalies by 30%.
- **Technical Excellence & Mentorship:** Recruited, structured, and scaled a premier engineering branch, mentoring senior and staff engineers while establishing robust CI/CD deployment pipelines and high-velocity development lifecycles.

CVS Health

Remote

Director / Engineering Manager - Digital Applications & Regulated Infrastructure

2014 – 2023

- **Healthcare ML & Core Architecture:** Owned the architecture, design, and deployment of secure applications operating in highly regulated environments, managing clinical, transactional, and claims data frameworks handling millions of secure daily operations.
- **Team Building & Scale:** Built, led, and scaled distributed agile squads of 12–18 engineers across 4 cross-functional divisions, prioritizing career development plans that improved sprint velocity by 20% and decreased team onboarding loops by 40%.
- **Cross-Functional & Executive Alignment:** Collaborated closely with Product, Product Design, Clinical Operations, and Delivery partners to scope high-impact initiatives, utilizing strong interpersonal and presentation skills to influence technical strategy at the level of executive leadership.
- **Compliance & Distributed Systems:** Managed the end-to-end lifecycle of distributed architectures utilizing relational and NoSQL engines (MSSQL, Postgres), ensuring complete data governance, payment gateway security, and strict healthcare compliance.

Enterprise Consultant

Various

Technical Lead / Senior Software Engineer

2005 – 2014

Client Portfolio: American Express, AT&T, Verizon, JPMC, Universal American, Alindus

- **System Architecture & Algorithms:** Directed deep exploration into complex data structures, algorithms, and secure software engineering methodologies, constructing high-throughput distributed transaction systems that drove a 15% optimization in query performance.
- **Agile Delivery & Integrity:** Managed task delegation and sprint velocity metrics for engineering pipelines, maintaining rigorous attention to detail and delivering production targets within fast-paced financial and telecom operational settings.

EDUCATION, CERTIFICATIONS & QUALIFICATIONS

- **Applied Agentic AI for Organizational Transformation** | MIT Professional Education (2026)
- **AWS Certified Solutions Architect – Professional** | Credential Verification Link
- **Bachelor of Technology (B.Tech) in Computer Science & Engineering** | Kakatiya University, India

- **Technical Stack Summary:** Python, PyTorch, TensorFlow, Azure ML, Databricks, Spark, Delta Lake, Azure DevOps, AWS Serverless, Lambda, JavaScript, MSSQL, Postgres, DynamoDB, Salesforce, React, TypeScript, SQL, GitHub, Jira Cloud.
