Prosper, TX 75078 | 989-312-3420 | bhagathsiddi@gmail.com | linkedin.com/in/bhagathsiddi

DIRECTOR OF AI ENGINEERING | STRATEGY & ENTERPRISE ML LIFE-CYCLE

Visionary Engineering Leader with 20+ years of software experience, specializing in architecting and scaling high-performing e-commerce, loyalty, and CRM platforms. Proven track record of developing strategic technical roadmaps, overseeing robust platform development from concept to production, and delivering seamless guest experiences that drive revenue growth. Expert in leveraging cloud-native ecosystems, including AWS and GCP, alongside modern web technologies like Node.js, React, and React Native, to ensure scalability, reliability, and security for high-volume traffic. Grounded in a collaborative culture, balancing aggressive execution timelines with a customer-centric focus on operational excellence and team empowerment.

CORE AI COMPETENCIES & TECHNICAL LEADERSHIP

- **E-commerce and Loyalty Platform Strategy:** Expert in developing and executing comprehensive platform strategies for e-commerce, loyalty, and CRM, translating business objectives into executable engineering roadmaps and ensuring architectural governance for scalable and reliable systems that drive revenue growth and guest experience.
- **Engineering Leadership and Team Development:** Over 10 years of software development experience with 5+ years leading and mentoring high-performing software engineering teams. Proven ability to foster a collaborative, results-oriented culture, provide technical guidance, and ensure high-quality software deliverables by setting performance metrics and inspiring excellence.
- **Cloud-Native Architecture and Scalability:** Deep expertise in overseeing the technical design and development of enterprise-grade e-commerce platforms, ensuring robust scalability, reliability, and security to handle high-volume traffic. Advanced proficiency with cloud computing services, including AWS and GCP, to build resilient and performant systems.
- **Modern Web and Full-Stack Development:** Strong technical foundation in modern web technologies, including Node.js, React, and React Native, with a track record of implementing best practices in software development, code quality, automated testing, and CI/CD pipelines for continuous delivery of new features and enhancements.
- **Agile Delivery and Product Collaboration:** Extensive experience with agile development methodologies, working collaboratively with Product Teams to define technical requirements, manage delivery dates, and ensure efficient team operation. Skilled in end-to-end ownership from rapid prototyping through production deployment and continuous monitoring.
- **Operational Excellence and Performance Monitoring:** Dedicated to ensuring the continuous performance, uptime, and speed of e-commerce and loyalty platforms. Defines and tracks success criteria for engineering projects, implementing robust monitoring solutions and optimizing systems to maintain operational excellence and meet business objectives.

PROFESSIONAL EXPERIENCE

7-Eleven

Frisco/Dallas, TX

Senior Engineering Manager / Head of Technology - *Now Delivery Platform*

2024 – 2026

- **AI Strategy & Product Development:** Spearheaded the adoption of advanced engineering practices and AI-native system designs, scaling the platform to support high-volume distributed applications serving over 250 million users.
- **Rapid Prototyping & Execution:** Led multi-scrum engineering teams to move fast from proof-of-concept to production-grade deployment on aggressive timelines, achieving a measurable 25% reduction in overall time-to-market.
- **Data-Driven Leadership:** Exercised sound judgment and swift decision-making to optimize core product roadmaps and timeline estimations, building cross-functional consensus with stakeholders to reduce post-launch system anomalies by 30%.
- **Technical Excellence & Mentorship:** Recruited, structured, and scaled a premier engineering branch, mentoring senior and staff engineers while establishing robust CI/CD deployment pipelines and high-velocity development lifecycles.

CVS Health

Remote

Director / Engineering Manager - *Digital Applications & Regulated Infrastructure*

2014 – 2023

- **Healthcare ML & Core Architecture:** Owned the architecture, design, and deployment of secure applications operating in highly regulated environments, managing clinical, transactional, and claims data frameworks handling millions of secure daily operations.
- **Team Building & Scale:** Built, led, and scaled distributed agile squads of 12–18 engineers across 4 cross-functional divisions, prioritizing career development plans that improved sprint velocity by 20% and decreased team onboarding loops by 40%.
- **Cross-Functional & Executive Alignment:** Collaborated closely with Product, Product Design, Clinical Operations, and Delivery partners to scope high-impact initiatives, utilizing strong interpersonal and presentation skills to influence technical strategy at the level of executive leadership.
- **Compliance & Distributed Systems:** Managed the end-to-end lifecycle of distributed architectures utilizing relational and NoSQL engines (MSSQL, Postgres), ensuring complete data governance, payment gateway security, and strict healthcare compliance.

Enterprise Consultant

Various

Technical Lead / Senior Software Engineer

2005 – 2014

Client Portfolio: *American Express, AT&T, Verizon, JPMC, Universal American, Alindus*

- **System Architecture & Algorithms:** Directed deep exploration into complex data structures, algorithms, and secure software engineering methodologies, constructing high-throughput distributed transaction systems that drove a 15% optimization in query performance.
- **Agile Delivery & Integrity:** Managed task delegation and sprint velocity metrics for engineering pipelines, maintaining rigorous attention to detail and delivering production targets within fast-paced financial and telecom operational settings.

EDUCATION, CERTIFICATIONS & QUALIFICATIONS

- **Applied Agentic AI for Organizational Transformation** | MIT Professional Education (2026)
- **AWS Certified Solutions Architect – Professional** | Credential Verification Link
- **Bachelor of Technology (B.Tech) in Computer Science & Engineering** | Kakatiya University, India
- **Technical Stack Summary:** Python, PyTorch, TensorFlow, Azure ML, Databricks, Spark, Delta Lake, Azure DevOps, AWS Serverless, Lambda, JavaScript, MSSQL, Postgres, DynamoDB, Salesforce, React, TypeScript, SQL, GitHub, Jira Cloud.
