Prosper, TX 75078 | 989-312-3420 | bhagathsiddi@gmail.com | linkedin.com/in/bhagathsiddi

DIRECTOR OF AI ENGINEERING | STRATEGY & ENTERPRISE ML LIFE-CYCLE

Seasoned Engineering and Product Leader with over 20 years of experience defining and executing digital product strategies, specializing in building high-performing cross-functional teams for B2B eCommerce. Proven track record of translating complex business objectives and contractor workflows into best-in-class digital experiences, driving rapid innovation from concept through large-scale production deployment across websites and mobile apps. Committed to a data-driven, customer-centric culture, I balance aggressive timelines with a focus on delivering measurable improvements in engagement, conversion, retention, and customer lifetime value. My leadership ensures operational excellence by integrating advanced cloud platforms, ERP, PIM, and CRM tools to deliver robust and scalable digital products.

CORE AI COMPETENCIES & TECHNICAL LEADERSHIP

- **Digital Product Strategy and Vision Execution:** Expert at translating complex executive business objectives into executable digital product roadmaps, setting the technical vision for scalable digital experiences, and maintaining architectural governance across websites and mobile apps, specifically for professional contractors.
- **End-to-End Product Lifecycle and Agile Delivery:** Comprehensive ownership from customer research and rapid prototyping through production deployment, experiment tracking, automated testing, and cloud-native observability. Leads agile product delivery and cross-functional execution to ensure aligned, on-time delivery of features and enhancements.
- **Customer-Centric Digital Experience and Insights:** Champion a data-driven, user-centric approach, leveraging analytics to measure and improve digital performance. Defines and tracks KPIs related to digital adoption, usage, order efficiency, account growth, and contractor satisfaction, translating insights into product strategies and prioritized backlogs for continuous improvement.
- **Cross-Functional and Team Leadership:** Dedicated to cultivating a high-performing product function with strong execution and customer empathy. Builds trusted, collaborative partnerships across Engineering, UX, Operations, Marketing, Sales, and Analytics, influencing without authority to drive alignment and mentorship for product managers and design teams.
- **Scalable Digital Platforms and B2B eCommerce Architectures:** Advanced proficiency with cloud-native ecosystems across Azure and AWS serverless computing, alongside Python and SQL data architectures. Applies this expertise to architecting and integrating core B2B eCommerce capabilities, ERP systems, PIM platforms, CRM tools, and distribution systems for robust and scalable digital products.
- **Strategic Optimization and Revenue Growth:** Identifies and unlocks new revenue and engagement opportunities leveraging customer insights, analytics, and innovative product strategies. Drives measurable improvements in engagement, conversion, retention, and customer lifetime value through enhancements to digital experiences, strategic trade-offs, and continuous optimization.

PROFESSIONAL EXPERIENCE

7-Eleven

Frisco/Dallas, TX

Senior Engineering Manager | Head of Technology - 7Now Delivery Platform

2024 – 2026

- **AI Strategy & Product Development:** Spearheaded the adoption of advanced engineering practices and AI-native system designs, scaling the platform to support high-volume distributed applications serving over 250 million users.
- **Rapid Prototyping & Execution:** Led multi-scrum engineering teams to move fast from proof-of-concept to production-grade deployment on aggressive timelines, achieving a measurable 25% reduction in overall time-to-market.
- **Data-Driven Leadership:** Exercised sound judgment and swift decision-making to optimize core product roadmaps and timeline estimations, building cross-functional consensus with stakeholders to reduce post-launch system anomalies by 30%.
- **Technical Excellence & Mentorship:** Recruited, structured, and scaled a premier engineering branch, mentoring senior and staff engineers while establishing robust CI/CD deployment pipelines and high-velocity development lifecycles.

CVS Health

Remote

Director | Engineering Manager - Digital Applications & Regulated Infrastructure

2014 – 2023

- **Healthcare ML & Core Architecture:** Owned the architecture, design, and deployment of secure applications operating in highly regulated environments, managing clinical, transactional, and claims data frameworks handling millions of secure daily operations.
- **Team Building & Scale:** Built, led, and scaled distributed agile squads of 12–18 engineers across 4 cross-functional divisions, prioritizing career development plans that improved sprint velocity by 20% and decreased team onboarding loops by 40%.
- **Cross-Functional & Executive Alignment:** Collaborated closely with Product, Product Design, Clinical Operations, and Delivery partners to scope high-impact initiatives, utilizing strong interpersonal and presentation skills to influence technical strategy at the level of executive leadership.
- **Compliance & Distributed Systems:** Managed the end-to-end lifecycle of distributed architectures utilizing relational and NoSQL engines (MSSQL, Postgres), ensuring complete data governance, payment gateway security, and strict healthcare compliance.

Enterprise Consultant

Various

Technical Lead | Senior Software Engineer

2005 – 2014

Client Portfolio: American Express, AT&T, Verizon, JPMC, Universal American, Alindus

- **System Architecture & Algorithms:** Directed deep exploration into complex data structures, algorithms, and secure software engineering methodologies, constructing high-throughput distributed transaction systems that drove a 15% optimization in query performance.
- **Agile Delivery & Integrity:** Managed task delegation and sprint velocity metrics for engineering pipelines, maintaining rigorous attention to detail and delivering production targets within fast-paced financial and telecom operational settings.

EDUCATION, CERTIFICATIONS & QUALIFICATIONS

- **Applied Agentic AI for Organizational Transformation** | MIT Professional Education (2026)
- **AWS Certified Solutions Architect – Professional** | Credential Verification Link
- **Bachelor of Technology (B.Tech) in Computer Science & Engineering** | Kakatiya University, India
- **Technical Stack Summary:** Python, PyTorch, TensorFlow, Azure ML, Databricks, Spark, Delta Lake, Azure DevOps, AWS Serverless, Lambda, JavaScript, MSSQL, Postgres, DynamoDB, Salesforce, React, TypeScript, SQL, GitHub, Jira Cloud.
