

BHAGATH SIDDI

Prosper, TX 75078 | 989-312-3420 | bhagathsiddi@gmail.com | linkedin.com/in/bhagathsiddi

DIRECTOR OF AI ENGINEERING | STRATEGY & ENTERPRISE ML LIFE-CYCLE

Visionary Engineering Leader | Creator Growth and Onboarding | Enterprise AI Integration

Engineering Leader with 20+ years of software development experience, specializing in building and scaling high-performing fullstack teams (iOS, Web, Backend) to drive creator growth and user onboarding across dynamic platforms. Proven track record in executing strategic technical roadmaps, owning agile delivery processes, and deploying highly scalable distributed systems for user-facing, high-visibility features within Dockerized CI/CD environments. Expert in fostering a culture of experimentation using A/B testing and data analytics, while driving the integration and optimization of enterprise AI tooling and influencing technical vision across XFN teams. Adept at cultivating talent, leading continuous rapid releases, and leveraging AWS services for cloud-native solutions.

CORE AI COMPETENCIES & TECHNICAL LEADERSHIP

- **Engineering Leadership and Talent Development:** Provides technical and people leadership, consistently leading, hiring, coaching, and managing the performance of diverse engineering teams, fostering growth, retention, and influencing XFN product and design relationships.
- **Agile Delivery and Product Ownership:** Owns the delivery process and Agile ceremonies, ensuring rapid, continuous releases, proper backlog refinement, and strategic work prioritization to reduce technical debt in CI/CD environments.
- **Fullstack Team Management and Architecture:** Experienced managing fullstack squads (iOS, Web, Backend), driving the development, architecture, and maintenance of user-facing, high-visibility features and scalable APIs across multiple stacks.
- **Enterprise AI Integration and Optimization:** Drives the integration and experimentation of enterprise AI tooling across team workflows, actively utilizing AI within daily operations to realize new efficiencies, measure quality gains, and drive continuous improvement.
- **Cloud-Native and Scalable Systems:** Proven history of building highly scalable distributed systems and processes in cloud environments, including Dockerized setups, leveraging AWS services (ECS, Lambda, RDS, Redshift, Glue), and designing robust RESTful, JSON, HTTP APIs.
- **Data-Driven Growth and Experimentation:** Cultivates a culture of experimentation, leveraging A/B testing and data analytics to validate hypotheses and optimize creator onboarding and reporting funnels, identifying appropriate metrics for team performance.

PROFESSIONAL EXPERIENCE

7-Eleven

Frisco/Dallas, TX

Senior Engineering Manager | Head of Technology - 7Now Delivery Platform

2024 – 2026

- **AI Strategy & Product Development:** Spearheaded the adoption of advanced engineering practices and AI-native system designs, scaling the platform to support high-volume distributed applications serving over 250 million users.
- **Rapid Prototyping & Execution:** Led multi-scrum engineering teams to move fast from proof-of-concept to production-grade deployment on aggressive timelines, achieving a measurable 25% reduction in overall time-to-market.
- **Data-Driven Leadership:** Exercised sound judgment and swift decision-making to optimize core product roadmaps and timeline estimations, building cross-functional consensus with stakeholders to reduce post-launch system anomalies by 30%.
- **Technical Excellence & Mentorship:** Recruited, structured, and scaled a premier engineering branch, mentoring senior and staff engineers while establishing robust CI/CD deployment pipelines and high-velocity development lifecycles.

CVS Health

Remote

Director | Engineering Manager - Digital Applications & Regulated Infrastructure

2014 – 2023

- **Healthcare ML & Core Architecture:** Owned the architecture, design, and deployment of secure applications operating in highly regulated environments, managing clinical, transactional, and claims data frameworks handling millions of secure daily operations.
- **Team Building & Scale:** Built, led, and scaled distributed agile squads of 12–18 engineers across 4 cross-functional divisions, prioritizing career development plans that improved sprint velocity by 20% and decreased team onboarding loops by 40%.
- **Cross-Functional & Executive Alignment:** Collaborated closely with Product, Product Design, Clinical Operations, and Delivery partners to scope high-impact initiatives, utilizing strong interpersonal and presentation skills to influence technical strategy at the level of executive leadership.
- **Compliance & Distributed Systems:** Managed the end-to-end lifecycle of distributed architectures utilizing relational and NoSQL engines (MSSQL, Postgres), ensuring complete data governance, payment gateway security, and strict healthcare compliance.

Enterprise Consultant

Various

Technical Lead | Senior Software Engineer

2005 – 2014

Client Portfolio: American Express, AT&T, Verizon, JPMC, Universal American, Alindus

- **System Architecture & Algorithms:** Directed deep exploration into complex data structures, algorithms, and secure software engineering methodologies, constructing high-throughput distributed transaction systems that drove a 15% optimization in query performance.
- **Agile Delivery & Integrity:** Managed task delegation and sprint velocity metrics for engineering pipelines, maintaining rigorous attention to detail and delivering production targets within fast-paced financial and telecom operational settings.

EDUCATION, CERTIFICATIONS & QUALIFICATIONS

- **Applied Agentic AI for Organizational Transformation** | MIT Professional Education (2026)
- **AWS Certified Solutions Architect – Professional** | Credential Verification Link
- **Bachelor of Technology (B.Tech) in Computer Science & Engineering** | Kakatiya University, India
- **Technical Stack Summary:** Python, PyTorch, TensorFlow, Azure ML, Databricks, Spark, Delta Lake, Azure DevOps, AWS Serverless, Lambda, JavaScript, MSSQL, Postgres, DynamoDB, Salesforce, React, TypeScript, SQL, GitHub, Jira Cloud.
